Engagement Framework

About Us

Our business model is built on helping innovators change the world and building the appropriate foundation for them to succeed. At LaCire, we do the work to put systems in place for proper business operations and growth. We help you define goals and milestones and create a path, understanding the boundaries and needs of the individual firm. We then work to move the team along this path, working through the challenging problems and creating simple and elegant solutions that are customized to you and your team. In the process, we enable your people to make the greatest contribution and all succeed.

Our scope of services varies based on the clients needs, organizational structure and culture. We offer packages for NEXT Members to support start-ups and businesses. LaCire works hard to operate within an organization's constraints and help advance the company based on their goals and milestones. LaCire will provide NEXT Members with the following tailored services to meet their operational needs:

NEXTTM

the future of startup law
